Encoded Archival Standards Update

2020-04-17

Thank you SAA, Archives Portal Europe, Open Preservation Foundation, and Digital Preservation Coalition!

All lines are **muted** to minimize noise

The image shows a Zoom meeting interface. On the left, a list of participants is titled "Participants (5)". Each participant has a profile picture and a name. The names are blurred, but the first two are "PM" and "SL". To the right of each name are icons for mute and video. All mute icons have a red diagonal line through them, indicating they are muted. An orange arrow points from the word "muted" in the text above to the first muted icon. On the right, a toolbar contains icons for Mute, Stop Video, Invite, Manage Participants, Share Screen, Chat, Record, and More. The "Chat" icon is highlighted with a red box. An orange arrow points from the word "chat" in the text below to the "Chat" icon. Below the toolbar, a chat window is open, showing a "Chat" header, a "To: Everyone" dropdown, and a text input field labeled "Type message here...".

TS EAS and GitHub

We thank OPF for helping us with how we should use GitHub!

A screenshot of the GitHub repository page for SAA TS-EAS. The repository is owned by the Society of American Archivists Technical Subcommittee on Encoded Archival Standards. It shows a list of repositories including eac-cpf-schema, TS-EAS-subteam-notes, EAS-TagLibraries, EAD3, and EAD2002. The page also displays statistics for each repository, such as stars, forks, and updates. On the right side, there are sections for "Top languages" (XSLT, Clean, HTML) and "People" (a grid of avatars of contributors).

Wanted change/feature

Please allow "head" within "biogHist"; my use case for this: working on extracting information on persons from our (APE) EAD3 additional finding aid implementation towards EAC-CPF, I would like to populate EAC-CPF's "biogHist" with multiple "p"s and would then like to be able to make some sort of chapter-like subdivision; at the moment, I can only do that using "abstract" which is not really meant for this of course, so I would like to use a "head" for that (just like in EAD2002 and EAD3); see the code and display example attached.
