

TS-EAS EAC-CPF Revision Meeting

Sub-elements of singular/plural elements

Ways to repeat an element

1. multiple singular elements

- repeat an element without wrapper
- *cpfDescription, otherRecordId, languageDeclaration, conventionDeclaration, rightsDeclaration, localTypeDeclaration, localControl, otherAgencyCode, agencyName, maintenanceEvent, eventDescription, sourceEntry, entityId, nameEntry*
- (part, adressline, chronItem, item, level)
- no child elements available

Ways to repeat an element

2. element sets

- set elements bundle different information and concepts in an element and they represent series of statements that as a group have meaning
- alternativeSet, dateSet, nameEntrySet
- element set are not always repeatable, it depend on the context

Ways to repeat an element

3. plural elements

- plural elements bundle singular, repeatable elements
- plural elements are not repeatable
- singular element within plural elements are repeatable

Ways to repeat an element

3. plural elements

//otherEntityTypes/otherEntityType

//places/place

//localDescriptions/localDescription

//legalStatuses/legalStatus

//functions/function

//languagesUsed/languageUsed

//occupations/occupation

//mandates/mandate

Child elements of singular elements

<term> (0..1)

<placeEntry> (0..n)

<date>, <dateSet>, <dateRange> (0..1)

<citation> (0..1)

<descriptiveNote> (0..1)

Child elements of plural elements

singular element (1..n)

<descriptiveNote> (0..1)

<citation> (0..n)

<p> (0..n)

<list> (0..n)

<outline> (0..n)

Decision

Do we need <term> and <citation> ?

Do we need <descriptiveNote> and <p>?

Do we need <list> and <outline>?
